

## *Icarus Journal—Special Issue on Lunar Volatiles*

*Icarus* publishes original work in the field of Solar System studies. The July 15, 2015 issue (volume 255) is devoted to the subject of lunar volatiles and is edited by Dana M. Hurley (Johns Hopkins University Applied Physics Laboratory), Matthew A. Siegler (Planetary Science Institute and Southern Methodist University), and Oded Aharonson (Weizmann Institute of Science). The research spans sample studies, laboratory experiments, numerical modeling, and remote sensing data analysis to better understand the nature, sources, and distribution of volatiles on the Moon. Though a subscription, individual or institutional, is needed to access the articles online, the [\*Icarus Table of Contents and Abstracts\*](#) are available to everyone. Articles:
